Mina Gvozdenov
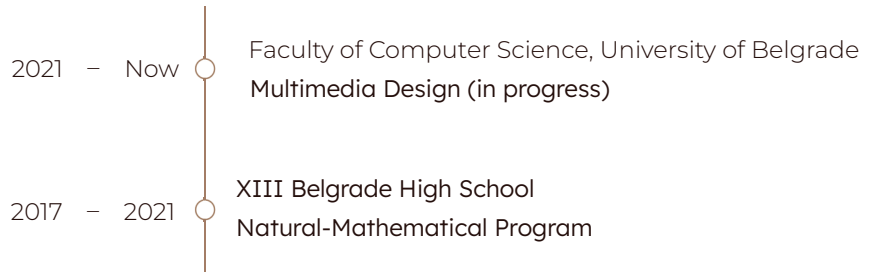

About me

I am currently a fourth-year student at the Faculty of Computer Science in Belgrade, studying Multimedia Design. What I particularly like about my faculty is that it is not focused on just one area, but rather allows us to try out different things and decide what interests us the most.

During my studies, I have worked on many different projects, including creating posters, flyers, and other promotional materials, as well as application design, web design, illustration, photography, and 2D and 3D animation.

My goal is to continue learning, developing, and advancing as a designer, constantly seeking new challenges and opportunities to expand my skill set, stay updated with the latest trends, and contribute to innovative and impactful design projects.
