

About me

I am a Multimedia Designer focused on UI/UX design, graphic design, visual identity and digital illustration.

I enjoy creating clean, engaging and visually consistent digital interfaces, with attention to layout, typography, icons, colors and overall user experience.

Through academic projects, student organization work and personal design explorations, I have worked on app design, web design, branding, social media assets, animation and visual concepts.

I am motivated to keep learning, collaborate with creative and multidisciplinary teams, and continue developing as a UI/UX and visual designer.
